

Bharat Super App — Requirements & User Stories

Engineering-facing specification: epics, user stories with acceptance criteria, functional and non-functional requirements, API surface, and a definition of done. Companion to the *Product & Technical Documentation*.

Format: INVEST user stories with Given/When/Then acceptance criteria · Priority: MoSCoW (Must / Should / Could) · Last updated 28 June 2026

| 8. E6 · Government | |

1 · How to read this document

Each **epic** groups related stories. Each **story** follows the form "As a <role>, I want <goal>, so that <benefit>" and carries **acceptance criteria** as Given/When/Then statements that QA can test directly. Priority uses MoSCoW: **Must** **Should** **Could**. Story IDs are stable (**E2-S3**) for traceability in the tracker.

2 • Epics overview

EPIC	TITLE	STORIES	PHASE
E1	Onboarding & authentication	4	P1
E2	AI assistant	6	P1
E3	Home	3	P1
E4	Area Intelligence	3	P1
E5	Health	4	P1
E6	Government schemes	4	P1
E7	Travel / Fuel	3	P2
E8	Emergency	3	P2
E9	Profile & settings	3	P1
E10	Farmer suite	4	P3

3 • E1 • Onboarding & authentication

E1-S1

MUST

First-run onboarding

As a **new user**, I want a short intro and language choice, so that I understand the app and use it in my language.

ACCEPTANCE CRITERIA

- Given a first launch, when the app opens, then a 3-slide onboarding with a language picker is shown.
- When I select a language, then the entire UI switches to it and the choice persists.
- When I finish or skip, then onboarding never appears again on this device.

E1-S2

MUST

Phone + OTP sign-in

As a **user**, I want to sign in with my phone number and an OTP, so that I can access the app securely without a password.

ACCEPTANCE CRITERIA

- Given a valid Indian mobile number, when I request an OTP, then a 6-digit code is sent and a timer with resend is shown.
- When I enter the correct OTP, then a session is created and I land on Home.
- When I enter a wrong OTP 3 times, then I am rate-limited with a clear message.

E1-S3

SHOULD

Biometric unlock

As a **returning user**, I want biometric unlock, so that I re-enter the app instantly and privately.

ACCEPTANCE CRITERIA

- Given a prior session and device biometrics, when I reopen the app, then Face/fingerprint unlock is offered.
- When biometrics fail or are unavailable, then OTP sign-in is the fallback.

E1-S4

MUST

Location & permissions

As a **user**, I want to grant location once, so that "near me" answers work, while keeping control over my data.

ACCEPTANCE CRITERIA

- When location is requested, then the rationale ("powers all near-me answers") is shown before the OS prompt.
- When I deny location, then the app still works with manual area entry and no dead ends.

4 • E2 • AI assistant

E2-S1

MUST

Ask by text

As a **user**, I want to type a question and get a clear answer, so that I solve a task without navigating menus.

ACCEPTANCE CRITERIA

- Given the chat is open, when I send a message, then a typing indicator appears within 1.2s and an answer bubble follows.
- When the answer has structured data, then it renders as a rich card, not raw text.
- When the query is ambiguous or low-confidence, then the assistant asks a clarifying question.

E2-S2

SHOULD

Ask by voice

As a **user on the move**, I want to ask by voice in Hindi or English, so that I can use the app hands-free.

ACCEPTANCE CRITERIA

- When I tap the mic, then live transcription is shown and editable before send.
- Given Hindi or English speech, then it is transcribed accurately and routed like a typed query.

E2-S3

MUST

Intent routing to domains

As a **user**, I want the assistant to understand which domain I mean, so that I get the right kind of answer.

ACCEPTANCE CRITERIA

- Given a medicine query, then a pharmacy result with an action to open Health is returned.
- Given an area query, then an Area Score card is returned.
- Given a scheme/fuel/power/water/emergency query, then the matching card/answer is returned.
- Given an off-domain query, then a graceful capability message lists what the assistant can do.

E2-S4

MUST

Rich result cards & deep-link actions

As a **user**, I want answers to include a one-tap action, so that I can act immediately.

ACCEPTANCE CRITERIA

- When an answer carries an action, then a CTA button (directions / apply / view / remind / call) is shown.
- When I tap a CTA, then I am deep-linked into the correct module pre-loaded with context.

E2-S5

SHOULD

Comparison & recommendation

As a **user**, I want the assistant to compare options and recommend, so that I can decide quickly.

ACCEPTANCE CRITERIA

- Given "Baner vs Wakad", then the answer contrasts both and ends with a clear recommendation and its basis.

E2-S6

COULD

Feedback loop

As a **user**, I want to rate an answer, so that future answers improve.

ACCEPTANCE CRITERIA

- When an answer is shown, then 👍 / 👎 controls are available and a tap is recorded with the query context.

5 • E3 • Home

E3-S1

MUST

AI search bar & quick actions

As a **user**, I want a prominent search bar and quick-action tiles, so that I can start any task in one tap.

ACCEPTANCE CRITERIA

- When I tap the search bar, then AI Chat opens focused for input.
- When I tap a quick action, then I deep-link to that module (Medicines, Fuel, Area, Schemes, Electricity, Explore, Water, Emergency).
- Then the search placeholder rotates through example prompts.

E3-S2

SHOULD

Recent searches

As a **returning user**, I want my recent searches, so that I can re-run them quickly.

ACCEPTANCE CRITERIA

- Then up to 5 recents are shown; tapping one re-runs the query in chat.

E3-S3

SHOULD

Local alerts

As a **resident**, I want local alerts (water, power, traffic), so that I can plan my day.

ACCEPTANCE CRITERIA

- Given my location, then active, time-bound alerts for my area are shown as cards with the window.
- When an alert expires, then it is removed.

6 • E4 • Area Intelligence

E4-S1

MUST

Area score & categories

As a **property seeker**, I want an overall area score and category breakdown, so that I can judge an area fast.

ACCEPTANCE CRITERIA

- Given a searched area, then a 0–10 score with a label (e.g. Excellent) and a map preview are shown.
- Then categories (safety, health, schools, internet, water/power, traffic) each show a score and one-line summary.

E4-S2

SHOULD

Property & nearby

As a **buyer/renter**, I want property stats and nearby amenities, so that I understand cost and convenience.

ACCEPTANCE CRITERIA

- Then avg rent, avg price, price growth and builder rating are shown.
- Then nearby counts (hospitals, schools, police, ATMs) are shown.

E4-S3

COULD

Save & compare areas

As a **user**, I want to save and compare areas, so that I can decide between options.

ACCEPTANCE CRITERIA

- When I save an area, then it appears under Profile › Saved › Areas.
- When I tap compare, then the assistant contrasts two saved areas.

7 • E5 • Health

E5-S1

MUST

Find a medicine nearby

As a **patient/caregiver**, I want to find a medicine at nearby pharmacies, so that I can buy it quickly and cheaply.

ACCEPTANCE CRITERIA

- Given a medicine name, then pharmacies are listed with distance, price, stock status and hours.
- When I tap Directions, then maps navigation opens to that pharmacy.

E5-S2

SHOULD

Generic alternatives & dosage

As a **cost-conscious user**, I want generic alternatives and dosage guidance, so that I save money and take medicine safely.

ACCEPTANCE CRITERIA

- Then a generic option with its price and a dosage note is shown, with a safety disclaimer.

E5-S3

SHOULD

Prescription scanner

As a **user**, I want to photograph a prescription, so that I don't type medicine names.

ACCEPTANCE CRITERIA

- When I upload/snap a prescription, then OCR extracts medicines and finds each nearby.
- When OCR is unsure, then it asks me to confirm the name.

E5-S4

COULD

Medicine reminders

As a **patient**, I want reminders, so that I never miss a dose.

ACCEPTANCE CRITERIA

- When I set a reminder, then notifications fire at the scheduled times and can be snoozed.

8 • E6 • Government schemes

E6-S1

MUST

Eligibility checker

As a **citizen**, I want to enter my details and see schemes I qualify for, so that I don't miss benefits.

ACCEPTANCE CRITERIA

- Given age, occupation, income, state, gender, when I run the check, then matching schemes are returned as cards.
- Then each card shows benefit, eligibility status, and required documents.

E6-S2

SHOULD

Category browse

As a **citizen**, I want to browse by category, so that I can explore relevant schemes.

ACCEPTANCE CRITERIA

- Then categories (Scholarships, Pension, Housing, Farmer, Startup, Women, Senior Citizen) filter the results.

E6-S3

SHOULD

Apply & documents

As a **beneficiary**, I want to start an application, so that I can claim a benefit.

ACCEPTANCE CRITERIA

- When I tap Apply, then I am taken to the official application with a checklist of required documents.

E6-S4

COULD

Document wallet & tracking

As a **beneficiary**, I want a document wallet and status tracking, so that applying is faster next time.

ACCEPTANCE CRITERIA

- Given DigiLocker linkage, then documents auto-fill where supported.
- Then application status is visible under Profile.

9 • E7 • Travel / Fuel

E7-S1

MUST

Least-crowded fuel nearby

As a **driver**, I want nearby stations sorted by crowd and price, so that I refuel fast and cheap.

ACCEPTANCE CRITERIA

- Then stations show distance, price/L, rating and a colour-coded crowd level, sorted least-crowded first.
- Then category chips filter Petrol / CNG / EV / Parking / Toilets.

E7-S2

SHOULD

Road-trip planner

As a **traveller**, I want a route plan with stops, so that a long trip is effortless.

ACCEPTANCE CRITERIA

- Given an origin→destination, then fuel stops, food, EV chargers, stays and attractions along the route are returned.

E7-S3

COULD

EV & parking availability

As an **EV driver**, I want live charger and parking availability, so that I avoid wasted trips.

ACCEPTANCE CRITERIA

- Then charger/parking cards show live availability where data exists.

10 • E8 • Emergency

E8-S1

MUST

One-tap emergency calls

As **anyone in distress**, I want one-tap calls to ambulance/police/fire/women-helpline, so that I get help instantly.

ACCEPTANCE CRITERIA

- Then each button dials the correct number via the OS dialer.
- Then the Emergency screen works without authentication and on low signal.

E8-S2

MUST

SOS with countdown

As a **user in danger**, I want an SOS that shares my live location, so that contacts and services can find me.

ACCEPTANCE CRITERIA

- When I trigger SOS, then a 3-2-1 countdown runs and is cancellable.
- When it completes, then live location is shared with 112 and my emergency contacts, and an active state is shown.

E8-S3

SHOULD

Nearby help

As a **user**, I want nearby hospitals, blood banks and police, so that I can reach the closest help.

ACCEPTANCE CRITERIA

- Then a list with distance and Directions is shown, ordered by proximity.

11 • E9 • Profile & settings

E9-S1

MUST

Theme & language

As a **user**, I want to switch theme and language, so that the app suits me.

ACCEPTANCE CRITERIA

- When I toggle dark mode, then the whole app re-themes instantly and persists.
- When I change language, then all UI strings switch and persist.

E9-S2

SHOULD

Saved items

As a **user**, I want saved medicines, areas, routes and schemes, so that I can return to them.

ACCEPTANCE CRITERIA

- Then saved items are grouped by type with counts and open their detail on tap.

E9-S3

COULD

AI personality & privacy

As a **user**, I want to set the assistant's tone and manage my data, so that it feels right and respects my privacy.

ACCEPTANCE CRITERIA

- When I set an AI personality, then the assistant's tone reflects it.
- Then I can review permissions and delete my data.

12 • E10 • Farmer suite (future)

E10-S1

SHOULD

Mandi prices

As a **farmer**, I want live mandi prices, so that I sell at the best market.

ACCEPTANCE CRITERIA

- Given a crop and my location, then nearby mandi prices are listed with distance and the best option highlighted.
- Then the flow is fully usable by voice in a regional language.

E10-S2

SHOULD

Weather & crop advisory

As a **farmer**, I want hyper-local weather and advisories, so that I plan sowing and protect my crop.

ACCEPTANCE CRITERIA

- Then a localised forecast with rain/frost/heat alerts and sowing/harvest windows is shown.

E10-S3

COULD

Crop doctor (AI)

As a **farmer**, I want to photograph a sick plant and get a diagnosis, so that I treat it correctly.

ACCEPTANCE CRITERIA

- When I upload a leaf photo, then the AI returns a likely pest/disease, a remedy and dosage, with a confidence note.

E10-S4

SHOULD

Farmer schemes & KCC

As a **farmer**, I want farmer-specific schemes and credit, so that I access support I'm entitled to.

ACCEPTANCE CRITERIA

- Then PM-KISAN, PMFBY crop insurance, KCC loans and subsidies are matched via the eligibility checker.

13 • API surface (indicative)

ENDPOINT	METHOD	PURPOSE
<code>/auth/otp/request</code>	POST	Send OTP to phone
<code>/auth/otp/verify</code>	POST	Verify OTP, create session
<code>/ai/query</code>	POST (stream)	Send query → streamed text + cards + actions
<code>/ai/feedback</code>	POST	Record 👍 / 👎 with context
<code>/area/score</code>	GET	Area score, categories, property, nearby
<code>/health/medicine</code>	GET	Pharmacies with stock & price
<code>/health/prescription</code>	POST	OCR a prescription image
<code>/schemes/eligibility</code>	POST	Match schemes to a profile
<code>/travel/stations</code>	GET	Fuel/EV/parking near a point
<code>/travel/roadtrip</code>	POST	Plan stops along a route
<code>/emergency/sos</code>	POST	Broadcast location to 112 + contacts
<code>/alerts</code>	GET	Active local alerts by area
<code>/profile</code>	GET/PATCH	Read/update profile, saved, settings

All endpoints require a session token except `/auth/*` and `/emergency/*`. `/ai/query` streams a response so the typing indicator and progressive card render feel instant.

14 • Non-functional requirements

AREA	REQUIREMENT
Performance	AI typing indicator < 1.2s; full card < 3s; cold start < 2.5s on mid-range Android.
Reliability	Emergency & SOS function offline / low-signal and without auth.
Accessibility	WCAG AA, dynamic type, screen-reader labels, ≥44px targets, reduced-motion support.
Localization	English + Hindi at launch; string externalisation for 6+ regional languages.
Privacy & security	DPDP-compliant consent, encrypted PII, biometric unlock, data-deletion path.
Resilience	Graceful degradation when a data source is stale or down; never fabricate.
Compatibility	iOS 15+ and Android 9+; installable PWA; responsive across phone sizes.

15 • Definition of done

A story is done when:

- All acceptance criteria pass in QA on both iOS and Android.
- Light and dark themes are both correct; layout holds across phone sizes.
- Empty, loading, error and offline states are designed and implemented.
- Accessibility checks pass (labels, contrast, targets, dynamic type).
- Analytics events for the story's key actions are firing.
- Strings are externalised for localization; no hard-coded copy.
- Telemetry/logging and error handling are in place; no console errors.
- Reviewed, merged, and covered by automated tests where applicable.
